

README

This project is downloadable as well from github.

<https://github.com/segmentedbit/impro-assignment>

A short description of the directory's.

documents:

This directory includes: result images of the pipelines, supporting documentation about the pipelines and a small user manual.

images:

The images used for segmentation

runnable program:

A Windows 8.1 compiled program directory. You need Windows 8.1 64 bit with the Visual C++ 2012 redistributable in order to run it correctly, we've tested this in a clean install of the OS.

The name of the executable is *GetARealOS.exe*

sourceCode:

The source code of the project. There is one '*main.cc*', some header files in the '*includes*' directory and some c++ source files in the '*src*' directory.
